Research Overview
RESEARCH OVERVIEW

Research Objectives
- Determine the percentage of mobile phone owners who play mobile phone games
- Understand current mobile phone game play activity and preferences
- Gather previous and future mobile phone game and/or game content purchase trends
- Benchmark to 2009 AT&T/PopCap mobile phone gaming survey where possible

Data Collection Overview
- Methodology: Web survey (ePanel)
- Audience (US and UK mobile phone owners)
- Survey length: 26 questions
- 814 qualified responses (486 US, 328 UK)

Survey Qualifications
- Live in the United States or United Kingdom
- Own a mobile phone
- Played a game on a mobile phone within the past month
Half (52%) of all mobile phone owners use a standard mobile phone, followed by one-fourth (27%) who have a smartphone and 21% who have a web-enabled phone.

- Smartphones and web-enabled phones have penetrated the UK market significantly more than in the US.

Q1. What type of mobile phone do you currently own and use?
Half (52%) of those who own a mobile phone have played a game on their mobile phone. At 73%, mobile phone owners in the UK have played a game on a mobile phone at some point, compared to 44% of those in the US.

33.6% (814) of the mobile phone owners played a game on their phone within the past month and are classified as mobile phone gamers, while 24.6% (597) are classified as avid mobile phone gamers, those who played a game on their phone within the past week.
83% of mobile phone gamers who own a smartphone have played a game on their mobile phone in the past week and are classified as avid mobile phone gamers.
Mobile Phone Gamer Profile

For the purposes of this survey a mobile phone gamer is defined as someone who has played a game on his/her phone in the past month. In addition, an avid mobile phone gamer is defined as someone who has played a game on his/her phone in the past week.
At 55%, slightly more males play games on their mobile phone than females (45%).
In the 2009 AT&T/PopCap mobile phone games survey, 51% of those playing mobile phone games were male and 49% were female.
The average age of a mobile phone gamer is 39.3 years, while avid mobile phone gamers are slightly younger at 38.0 years.

- 44% of the mobile phone gamers are less than 34 years old, another 40% are between 35 and 54 years old, while the remaining 16% are 55 or older.
- Avid mobile phone gamers are slightly younger with 48% less than 34 years old, 38% between 35 and 54 years old, and 13% 55 years and older.

Mobile phone gamers who own a smartphone tend to be younger (37.3 years) than those who have a standard or web-enabled phone (42.4 years).

Mobile phone gamers from the UK are also slightly younger (38.5 years) than those in the US (39.8).
The annual household income of mobile phone gamers and avid mobile phone gamers is comparable, with half earning less than $50,000, one out of five earning between $50,000 and $74,999 and the remainder earning more than $75,000 annually.

- Those who own a smartphone earn more annually, with one-third (32%) earning more than $75,000.
- Mobile phone gamers in the US earn more annually than those in the UK.
MOBILE PHONE OWNERSHIP

The majority (61%) of the mobile phone gamers own a smartphone, followed by 22% who have a web-enabled phone and 17% who have a standard mobile phone.

The number of those owning a smartphone increases among avid mobile phone gamers, with 69% smartphone owners, 19% web-enabled phone owners and 12% standard mobile phone owners.

Although smartphone usage is higher in general in the UK than in the US, the same is not true among mobile phone gamer.

- Slightly more of those in the US who are mobile phone gamers own a smartphone than those in the UK (63% vs. 57%).

Q2 What type of mobile phone do you currently own and use?
Mobile Phone Game Play Activity
FREQUENCY OF MOBILE PHONE GAME PLAY

- A shift has occurred in the frequency of mobile phone game play over the past two years.
  - 84% of mobile phone gamers and 97% of avid mobile phone gamers currently play games on their mobile phone at least once a week, compared to only 40% in 2009.
  - Daily mobile phone game play has more than doubled with 35% of mobile phone gamers and 47% of avid mobile phone gamers playing daily, compared to 13% in 2009.

- The expanded adoption of smartphones has also influenced the increased frequency of mobile phone game play.
  - 92% of mobile phone owners who own a smartphone play mobile phone games weekly, and 45% play daily.

Q5: How often do you typically play games on your mobile phone?
Although the frequency of mobile phone game play has increased over the past two years, the number of total hours per week has not increased, compared to the 2009 results.

- 68% of the mobile phone gamers and 61% of the avid mobile phone gamers play less than one hour per week, compared to 71% of those in 2009.

- 37% of smartphone owners spend at least one hour a week playing mobile phone games, compared to 25% of the standard and web-enabled phone owners.

Q6 How many hours per week do you play games on your mobile phone?
Two-thirds (66%) of the mobile phone gamers and avid mobile phone gamers have been playing games on a mobile phone for at least one year.

- This is lower than the 2009 AT&T/PopCap survey results, where 78% had been playing mobile phone games for at least one year. This indicates an increase in the number of mobile phone owners who are fairly new to mobile phone gaming.

62% of the smartphone owners have been playing mobile phone games for at least one year.

Q7 How long have you been playing games on a mobile phone?
Excluding making and receiving calls, mobile phone game play accounts for an average of 23% of a mobile phone gamers’ phone usage, while avid mobile phone gamers spend 27% of their mobile phone time (excluding calls) playing games.

• Smartphone owners spend one-quarter (25%) of their mobile phone time (excluding calls) playing games.
Half (50%) of the mobile phone gamers said their game play has increased over the past year, 40% said it is about the same, while 10% said it has decreased.

Among the avid mobile phone gamers, 59% said their game play has increased, and 35% said it was about the same.

- A comparison of the current results to those from the 2009 survey indicates a sharp jump in the number of mobile phone gamers who said their mobile phone game play activity has increased.
- Smartphone ownerships is a primary driver towards increased mobile phone game play, with 63% indicating their mobile phone game play has increased over the past year.
FACTORS INFLUENCING INCREASED MOBILE PHONE GAME PLAY

- The availability of more free games (79%) is the number one factor driving increased mobile phone game play, followed by the acquisition of a new phone with more memory or better game play capabilities at 59%.
- Almost half (48%) cited improved game graphics as influencing their increased mobile phone game play.
- Almost two-thirds (63%) of smartphone owners said getting a new phone with more memory and better game play capabilities influenced their increased mobile phone game play.

Q10 What has influenced the increase in your game play on your mobile phone?
Three-fourths (78%) of the mobile phone gamers Agree (Strongly and Somewhat Agree) that mobile phone gaming has become a regular part of their *weekly* activities, while 59% said they Strongly and Somewhat Agree that mobile phone gaming has become a regular part of their *daily* activities.

87% of avid mobile phone gamers Agree that mobile phone gaming has become a regular part of their *weekly* activities, while 72% Strongly or Somewhat Agree that mobile phone gaming has become a regular part of their *daily* activities.

Among smartphone owners 87% said mobile phone gaming has become a regular part of their *weekly* activities, compared to 68% who said it has become a regular part of their *daily* activities.

Q11. How much do you agree or disagree with the following:
11A - Mobile phone gaming has become a regular part of my *weekly* activities. 11B - Mobile phone gaming has become a regular part of my *daily* activities.
Over the past two years, a shift has occurred among mobile phone gamers away from game play on desktop/ laptop computers and towards game play on a mobile phone.

- The current survey results reveal that 44% of mobile phone gamers said the majority of their game play is on their mobile phone, followed by 30% who continue to play games most often on a computer.
- In 2009, 53% said they play games most often on their computer, while only 17% said they play most often on their mobile phone.

More than half (55%) of the smartphone owners, who play games on their mobile phone, play most often on their mobile phones, followed by 22% who play games most often on a desktop/laptop computer.
The primary benefits derived from playing games on a mobile phone include a distraction from the issues of daily life (57%), relief from boredom (56%) and relaxed and less stressed out (56%).

Q12 Which of the following benefits have you experienced as a result of playing games on your mobile phone?

</table>
Social Game Play on Mobile Phone
Almost two-thirds (63%) of mobile phone gamers and 70% of avid mobile phone gamers are involved in social networking and have accessed Facebook, MySpace or Bebo from their mobile phone in the past month.

• 78% of smartphone owners, who have played a game on their mobile phone, have accessed Facebook, MySpace or Bebo from their mobile phone in the past month.
• 66% of the US mobile phone gamers accessed Facebook, MySpace or Bebo from their mobile phone, compared to 60% of those in the UK.
SOCIAL GAMEPLAY ON MOBILE PHONE

- Almost half (47%) of mobile phone gamers and 53% of avid mobile phone gamers play social networking games on their mobile phone.
- 57% of smartphone owners play social networking games on their mobile phone, while those in the US are more likely to play social games on their mobile phone (50%) than those in the UK (43%).

Mobile Phone Game
Purchase Behavior
There is a positive trend upwards with respect to the number of mobile phone gamers who have purchased or plan to purchase one or more mobile phone games.

- In 2009, 52% of the mobile phone gamers and 59% of the avid mobile phone gamers purchased at least one mobile phone game. This increased to 61% and 69% respectively in 2010 and is projected to jump to 65% and 71% this year.

Between 2009 and 2010, the number of smartphone owners purchasing one or more mobile phone games increased 12%. This trend is also evident among mobile phone gamers in the UK.
The average number of mobile phone games purchased from 2009 to 2010 increased, although when asked how many mobile phone games they anticipate purchasing in 2011, respondents provided more conservative estimates, resulting in a slight pull back.

Smartphone owners purchased almost twice as many games for their mobile phones in 2010 as those who own a standard or web-enabled phone (5.4 vs. 2.9).

27% of the mobile phone gamers and 32% of the avid mobile phone gamers purchased content for a mobile phone game they originally obtained for free.

One-third (34%) of smartphone owners purchased content for a mobile phone game they originally obtained for free.

Q16 In the past year, have you purchased any content (power-ups, new levels/modes, etc.) for a mobile phone game that you originally obtained for free?
There is a positive trend upwards with respect to the number of mobile phone gamers who have spent or plan to spend at least $6.00 per year on games for their mobile phone.

- In 2009, 41% of the mobile phone gamers and 49% of the avid mobile phone gamers spent at least $6.00 on mobile phone games. This increased to 49% and 58% respectively in 2010 and is projected to jump to 52% and 61% this year.

Between 2009 and 2010, the number of smartphone owners spending $6.00 or more on mobile phone games increased sharply. This trend is also evident among mobile phone gamers in the UK.

Q17  How much did you spend on games for your mobile phone in 2009 and 2010?  Q19  How much do you anticipate spending in 2011?
The average amount spent on mobile phone games from 2009 to 2010 increased among both mobile phone gamers and avid mobile phone gamers, while the anticipated spending in 2011 indicates a slight increase.

Smartphone owners spent almost $10.00 more on mobile phone games in 2010 as those who own a standard or web-enabled phone ($25.57 vs. $15.70).

Those in the US spend significantly more on mobile phone games than those in the UK.

Q17 How much did you spend on games for your mobile phone in 2009 and 2010? Q19 How many do you anticipate spending in 2011?
Key Takeaways
Half of those who own a mobile phone have played a game on their mobile phone. Mobile phone owners in the UK are more likely to play games on their mobile phone than those in the US (73% vs. 44%).

The majority (61%) of those playing games on their mobile phone own a smartphone.

Three-fourths of those who play mobile phone games are avid mobile phone gamers who played a game on their mobile phone in the past week. One-fourth are mobile phone gamers who have played a game on their mobile phone in the past month.

The average age of a mobile phone gamer is 39.3 years, while avid mobile phone gamers are slightly younger at 38.0 years.

83% of those owning a smartphone played a mobile phone game in the past week, and therefore are classified as avid mobile phone gamers.

The frequency of mobile phone game play has increased over the past two years. 84% of mobile phone gamers and 97% of avid mobile phone gamers currently play games on their mobile phone at least once a week, compared to only 40% in 2009.

Daily mobile phone game play has more than doubled in the past two years, with 35% of mobile phone gamers and 47% of avid mobile phone gamers playing daily, compared to 13% in 2009.

The expanded adoption of smartphones has also influenced the increased frequency of mobile phone game play, with 92% of smartphone owners playing mobile phone games weekly and 45% playing daily.
KEY TAKEAWAYS

- Mobile phone game play accounts for one-fourth of a mobile phone gamer’s phone usage (excluding calls).
- 59% of the avid mobile phone gamers said their mobile phone game play has increased over the past year.
- 87% of avid mobile phone gamers Agree that mobile phone gaming has become a regular part of their weekly activities, while 72% Agree that mobile phone gaming has become a regular part of their daily activities.
- In 2009, 53% of mobile phone gamers said they play games most often on their computer, while only 17% said they play most often on their mobile phone. Currently, half of the avid mobile phone gamers play most often on their mobile phone.
- More than half of the avid mobile phone gamers play social networking games on their phone, with more than three-fourths playing at least once a week, and 44% playing daily.
- Smartphone owners purchased almost twice as many games for their mobile phones in 2010 as those who own a standard or web-enabled phone (5.4 vs. 2.9).
- Smartphone owners spent almost $10.00 more on mobile phone games in 2010 as those who own a standard or web-enabled phone ($25.57 vs. $15.70).
- Half of the avid mobile phone gamers upgraded a free game trial or free game app to a paid version in the past year, while one-third purchased content for a mobile phone game they originally obtained for free.
Research Methodology
This international research was conducted by Information Solutions Group (ISG; [www.infosolutionsgroup.com](http://www.infosolutionsgroup.com)) exclusively for PopCap Games. The results are based on 2,425 online surveys completed by members of the world’s largest online ePanel (Toluna) in the United States and United Kingdom between January 25 and January 31, 2011.

To qualify for participation in the survey, individuals must own and use a mobile phone. Among these mobile phone owners, 814 were identified as mobile phone gamers (those who played a game on his/her mobile phone in the past month). In addition, 597 of the mobile phone gamers were identified as *avid* mobile phone gamers (those who played a game on his/her mobile phone within the past week). Finally, 495 of the mobile phone gamers were also identified as smartphone owners. In theory, in 19 cases out of 20, the results will differ by no more than 2.4 percentage points from what would have been obtained by seeking out and polling all US and UK mobile phone owners age 18 and over. Smaller subgroups reflect larger margins of sampling error. Other sources of error, such as variations in the order of questions or the wording within the questionnaire, may also contribute to different results.
About ISG
Information Solutions Group (ISG) specializes in providing its clients with full-service market research programs designed to enable businesses to make sound strategic decisions. Its services include a wide range of custom research and analysis solutions for both consumer and business-to-business product and service companies. ISG’s services include market segmentation, customer satisfaction measurement, product development, public relations, competitive performance and pricing research. ISG uses online, telephone and mail survey methodologies and provides design, implementation and analysis services in the North American, EMEA and Asia Pacific markets. Examples of the type of information an ISG program can deliver can be obtained at www.infosolutionsgroup.com
About Toluna/Greenfield
Toluna Online is the world’s leading independent online panel and survey technology provider to the global market research industry. The company provides online sample and survey technology solutions to the world’s leading market research agencies, media agencies and corporations, from its 17 offices in Europe, North America and Asia Pacific. In 2009, Toluna welcomed Greenfield Online and Ciao Surveys into the group – complementing its traditional strengths in Europe and increasing its online sample and delivery capacity in the US, Canada and Asia Pacific. Additional information on Toluna can be obtained at http://www.toluna-group.com/en/
